

Sky visor **WIND**

Digital In-House Rotor-Blade Inspection & Management Platform.

Predictive Blade Maintenance
thanks to **Automatic Data Acquisition & AI**

Inspect independently
in 18 minutes

Detect defects &
track their evolution

Collaborate with your
subcontractors

Digitalize Your Entire Portfolio With **One Solution Only**

Inspect - Analyze - Collaborate

AUTOMATED DRONE INSPECTION

Collect Your Own Data Flexibly & Independently

In-House Solution

- 100% automatic flight
- Any turbine manufacturer
- Only one rotor stop

High Quality Inspection

- 18 min per wind turbine
- 150 images per blade
- 1 pixel = 1 mm

ASSET MANAGEMENT PLATFORM

Digitalize Your Portfolio & Detect Defects Using AI

Digital Twin

- Multi-source data input
- Asset lifecycle monitoring
- Automatically generated reports
- User-friendly platform

Powerful Defect Manager

- Custom AI defect detection
- Defect evolution monitoring
- Data comparison over time
- Sharing & collaborative tools
